SUMMARY

Software Engineer with a strong focus on System Maintenance and Quality Assurance. Currently specializing in User Acceptance Testing (UAT) and system documentation, with a proven background in resolving backend bugs and managing code integrity via GitLab. Experienced in the full Software Development Life Cycle (SDLC), ranging from hands-on fixes in C# and VB.NET to cloud monitoring using AWS CloudWatch during internship. A detail-oriented professional committed to enhancing system reliability and ensuring high-quality software delivery through rigorous testing and data-driven analysis.

WORKING EXPERIENCE

JUNIOR SOFTWARE ENGINEER (QA & TESTING)

February 2026 – Present

EBI Resources Sdn. Bhd

- Coordinate User Acceptance Testing (UAT) and documentation for the e-Lesen Perikanan system to ensure all functional requirements align with stakeholders' specifications
- Perform minor system fixes based on user feedback during testing phase
- Streamline technical documentation and bug reporting to facilitate clear communication between end-users and the development team

SOFTWARE ENGINEER INTERN

August 2025 – January 2026

Fiuu (formerly known as Razer Merchant Services Sdn. Bhd)

- Contributed to the development and maintenance of the Fiuu Back-Office System, a core platform supporting thousands of merchants in managing digital payments.
- Resolved complex bugs using C# and VB.NET to ensure seamless merchant transactions.
- Managed end-to-end SDLC workflows including issue tracking in GitLab and initiating Merge Requests (MRs) for peer reviews to maintain high code quality standards.
- Monitored system performance and logs via AWS CloudWatch
- Ensured production stability by conducting rigorous unit testing and debugging

PART-TIME BARISTA

January 2026 – February 2026

Kenangan Coffee

- Provided efficient customer service and managed high-volume orders in a fast-paced environment

PROJECTS

E-lesen Perikanan

- Identified and resolved system inconsistencies through rigorous debugging, improving overall software reliability
- Lead the User Acceptance Testing (UAT) for the e-Lesen Perikanan project by coordinating with stakeholders to ensure 100% alignment with functional requirements
- Bridged the gap between technical constraints and user needs by translating UAT feedback into actionable development tasks.

Fiuu Backoffice System

- Collaborated in the development and maintenance of the Fiuu Backoffice system, ensuring seamless internal operations and data management for payment processing.
- Enhanced system reliability by identifying and resolving critical bugs, contributing to a more stable environment for high-volume financial data

Online Shopping System for Adik Cosmetics

- Developed a full-stack e-commerce platform for final year project using Laravel and Firebase Firestore to digitize business operations and support real-time data processing.
- Integrated GPT-4 based chatbot to provide automated customer assistance, enhancing user engagement and support efficiency.
- Implemented secure payment gateways via Stripe and ToyyibPay and built RESTful APIs to ensure seamless frontend-backend communication.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), C#, VB.NET, HTML5, CSS3, Java

Framework/Libraries: Laravel, React.js, Node.js, Tailwind CSS, Bootstrap

Databases: Firebase Firestore, MongoDB, MySQL, Supabase

Tools & Cloud: AWS CloudWatch, Git (GitLab/GitHub), Postman, Figma

Methodologies: User Acceptance Testing, SDLC, Agile (SCRUM), RESTful APIs

EDUCATION

UNIVERSITI TUN HUSSEIN ONN MALAYSIA

October 2022 – January 2026

Bachelor of Computer Science (Software Engineering) With Honours

- **Major courses:** Object-Oriented Programming (OOP), .NET Programming, Data Mining, data Science, Software Testing, Web Development, Software Engineering Security, Database
- **CGPA:** 3.72
- **Dean's list for 6 semesters**

UNIVERSITI TEKNOLOGI MARA

August 2021 – May 2022

Foundation in Science

- **Major courses:** Chemistry, Physics, Biology, Mathematics, English
- **CGPA:** 3.75
- **Muet:** Band 4.5
